
UPDATE IN ALLIED HEALTH FOR HEALTH PROFESSIONALS IN PALLIATIVE CARE

Friday 4th March 2011

A range of presentations to update palliative care health professionals about developments in allied health and related specialities.

Our target audience includes doctors, nurses, and any health professional working in palliative care who is interested in furthering their knowledge of allied health.

Topics include:

The reality of end of life care for community based allied health professionals; spirituality, grief & loss in social work; cancer survivorship; allied health referral tool; music therapy; moving right along; an Indigenous perspective; lymphoedema management; capacity building of allied health professionals in community and acute care; when is enough chemotherapy enough?

See next page for full program
